Developing Musical Minds and Hearts

It is rewarding to watch our students’ musical skills develop.

We observe routine improvements in note reading, technical dexterity and increasingly difficult repertoire, but also witness profound development that is subtle and not readily measured. Consider the evolving aspects of artistry: creativity, expression and sensitivity. Or, what about discipline, focus, tenacity, deep analysis, and flexible learning strategies?

That is quite an impressive list. And, importantly, these abilities can develop with excellent piano teaching. We elevate our teaching objectives by cultivating an artistic mindset. Insightful analysis, creative daring, and expressive sensitivity are potent qualities that are valued throughout a student’s life. These attributes of artistry are captured in the acronym A-C-E™—Analysis, Creativity and Expression—and take center stage in Piano Adventures®.

The Discovery question with each piece invites analysis, each unit includes a creative activity, and the Technique Secrets along with Artistry Magic pages develop expression.

Analysis and creativity imply the left and right hemispheres of the brain, respectively. Modern neuroscience additionally finds that the “analytical” left brain manages expertise and the “creative” right brain processes the new and novel. Artistry requires integration of both hemispheres. Indeed, for a trained musician, music activates the whole brain.

What about the third attribute of artistry? How does expression fit our model? Perhaps we simply acknowledge that expression comes from the heart. The metaphor could not be more fitting. Whole brain education is compelling, but perhaps incomplete. As piano teachers we can have transcendent influence. We develop musical minds… and hearts.

The 2nd Edition of Level 3B is a fresh, dynamic update for early-intermediate students. This is the level of contrasts: fast fingerwork contrasted with sonorous tonal colors, and traditional harmonies mingled with contemporary sounds. Compositions from Dvořák, Rebikov, and Liszt are included along with new Faber originals. The Theory Book offers musical analysis, while the Technique & Artistry Book develops fast fingers.

**Concepts and Features**
- Reorganization of units grouping major and relative minor keys
- Am, Dm, and Em natural and harmonic minor scales and primary chords (i, iv, and V7)
- Motive and sequence
- Octave playing; the scale in octaves
- Major and minor 3rds; 12 major and minor triads
- 12-bar blues chord progression
- Root position, 1st, and 2nd inversion chords
- 16th-note rhythm patterns

The 4th CORE method books include...

**Technique & Artistry**
- FF1181 $6.50
- FF1182 $6.50
- FF1180 $6.50

The four Level 3B Technique Secrets develop fluency for early-intermediate repertoire: Closed Hand for Scale Passages, Voicing the Melody, Open Hand for Extensions and the Up-Touch. Various exercises review and apply the Secrets, leading to Artistry Magic pieces that are suitable for recital performance.

**Performance**
- FF1182 $6.50
- FF1180 $6.50

A rag-like waltz gives rhythm practice in E minor.

**Theory**
- FF1181 $6.50

Song Lists on page 39

At Levels 3A-3B, students need time to consolidate their piano skills. This is a great time to explore diverse, fun repertoire. For this reason, we label this early-intermediate level as “FunTime® Piano.” Many students benefit from completing several FunTime® Books before graduating up to Level 4 — BigTime® Piano. So have a “fun time” with the sounds of jazz & blues, rock n’ roll, popular, classics and more!
Level 4 guides the intermediate student to perform with bravura, sensitivity, and advancing technical skill. All sharp key signatures are presented and practiced in pieces with up to four sharps. The level features extensive chord inversions, minor scales with 16th notes, and four-note root position dominant 7th chords. Composers include Joplin, Grieg, J.S. Bach, and more.

**Concepts and Features**
- 16th-note two-octave major and harmonic minor scales: C and Am, G and Em, F and Dm, and D, A, and E major
- The dominant 7th chord (V7) in root position
- The dotted eighth to sixteenth-note rhythm
- The sharp pattern and pieces in D, A, and E major
- A lead sheet that uses the root position V7 chord
- Increased facility with chord inversions in major and minor keys
- Challenging pieces such as a sonatina, mazurka, and gigue

**The FOUR CORE method books include...**

Students at Level 5 and above often work on difficult repertoire — pieces that can take weeks or months to learn and polish. It is important to pair that repertoire with shorter pieces that can be learned in a week or two.

For that reason, consider assigning a sequence of BigTime® books to your advancing students. They’ll continue to develop facile reading while exploring contrasting styles and sounds. And, it is fun for the teacher and the student!

See page 47 for BigTime® song titles!

Paired with each piece is a famous classic poem to inspire artistry at the keyboard. This poem, Windy Nights, describes a man on a galloping horse — a perfect complement to Schumann’s The Wild Horseman.

Windy Nights
Whenever the wind is high,
All night long in the dark and wet,
A man goes riding by.
Late in the night when the fires are out.
Why does he gallop and gallop about?

Benefits of Accompaniments

Background accompaniments can be a wonderful teaching tool both in the studio and at home, conveying a sonic world of rhythm, melody and harmony that educates and motivates. The accompaniments can be used throughout the life cycle of a piece, from first listening to final performance.

Introduction and Exploration

Ask students to listen to the accompaniment one week before introducing the piece in the lesson. This orients the ear to the general character, tempo, and rhythms. At the next lesson, demonstrate the piece by playing with the accompaniment at full performance speed. Next, get the student involved by clapping, pointing to each note in time with the recording, or by singing the lyrics, note names, or finger numbers.

Rhythmic Practice

Playing with a background accompaniment demands correct rhythm. Students learn to feel the meter, sense the forward musical flow of the time signature, and understand the need to “keep on going.” The rhythmic encouragement can make home practice more productive.

Musical Growth

The musical vignettes in these recordings introduce the student to a variety of sounds and ensembles. Exposure to these orchestrated interpretations not only makes the student more musically literate, but inspires performance with rhythmic vitality, forward motion, and musical expression.

Listening to an example can be worth a thousand words!
